Professional Summary

A dedicated and detail-oriented IT professional with a background in software engineering and a strong interest in scalable infrastructure and data-driven solutions. Experienced in developing and implementing financial compliance systems, academic platforms, and logistics systems. Skilled in a variety of programming languages and technologies, with a practical understanding of cloud-native technologies and DevOps principles. Seeking to apply my technical skills and problem-solving abilities to contribute to innovative IT solutions.

Professional Experience

Software Developer | Nyarutarama Sports Trust Club Ltd, APTC Ltd, Centre Saint Paul Ltd (2025)

- Designed and implemented a Virtual Sales Data Controller (VSDC) system.
- Integrated company financial systems with the Rwanda Revenue Authority (RRA) Electronic Billing Machine (EBM) system for compliance and real-time reporting.
- Provided technical support for VAT declaration issues with the RRA.
- Applied devops practices

Software Development Trainer | Garden TSS

- Conducted training sessions on JavaScript, DevOps, game development with Vue, advanced web technologies with React, backend system design, and NoSQL databases using MongoDB.

Technical Skills

- Programming Languages:** JavaScript (React, Node.js, Next.js), PHP (Laravel), Python, Go, Java
- Databases:** PostgreSQL, MySQL, MariaDB, MongoDB, Redis, SQLite
- Frontend:** React, Tailwind CSS, shadcn/ui, Framer Motion, Figma
- Backend & APIs:** Node.js, Prisma & drizzle ORM, REST APIs
- Infrastructure & DevOps:** Docker, Kubernetes, Proxmox, LXC, Ansible, NGINX, Git

Projects

Home Lab for Infrastructure Practice

- Built and maintained a personal lab to gain hands-on experience with scalable

- Facilitated a collaborative learning environment through peer engagement and project showcases.

Software developer intern at [Tekki Ltd](#)(2023 Apprenticeship), [Etite Ltd](#)(2024) and [Afrisoft lab](#) Ltd(2025)

Awards & Professional Development

Andela Technical Leadership Program

- Completed a 10-month bootcamp focused on software engineering, full-stack web development, and technical leadership.
- Contributed to the development of a full eCommerce platform, including a React/Tailwind CSS frontend and a Node.js backend.
- Worked within an agile team, applying DevOps practices for application deployment.

Hackathon Winner: Tackling Youth Unemployment in Rwanda | National Institute of Statistics Rwanda (NISR)

- Received a Certificate of Recognition for a data-driven solution to address youth unemployment.
- Collaborated on a project involving job market analysis and skill gap mapping.
- Contributed to a proposal for targeted training programs based on market demand.

infrastructure deployment.

- Utilized Ansible for environment provisioning automation.
- Hosted services including Jellyfin, Samba, PostgreSQL, MariaDB, and MongoDB.
- **Technologies Used:** Docker, Proxmox, LXC, Ansible.

Rwandalogx – Delivery Logistics Platform

- Designed the UI/UX in Figma for a proposed parcel delivery management system for Kigali.
 - Outlined a system architecture for route optimization and real-time tracking features.
 - **Proposed Tech Stack:** React, Node.js, PostgreSQL, Docker.
-

Education

Advanced Diploma in Information Technology | Rwanda Polytechnic, Ngoma College
(Feb 2022 - Sept 2024)

- **Relevant Coursework:** Software Engineering, Databases, Networking, Cloud Computing, Operating Systems, Data Structures & Algorithms.
 - **Final Year Project:** Open Scalable IT Infrastructure.
-

Certifications

- **Technologies Used:** Python (Pandas, Matplotlib, Streamlit).

Winner – RP Student Innovation Competitions

- Recognized as part of the winning teams for a student portfolio management system (2022) and a Hotel Property Management System (2023).
